**RE: TOWN OF LAKESHORE AUDIO & VIDEO EQUIPMENT INSTALLATION**

The Town of Lakeshore chose Custom Electronic & Automation (C.E.A.) to supply and install various audio and video presentation equipment in our main administrative building.

The equipment consisted of two video projectors, an audio amplifier and mixer for Council Chambers and various cabling in two separate conference rooms.

The installation setup and training were conducted very professionally and courteously. To date, our staff has been very pleased with the devices and the quality of them.

Sincerely,

Brian Lucier  
Manager of Information Technology
